

Introduction to Long Term Follow-up

Congratulations on your transition to the Long Term Follow-up Program.

For children and young adults who have been treated for cancer, this is an important milestone – so be proud of your success and look forward to a healthy future!

Follow-up care will be different for each person who has been treated for cancer. Your Long Term Follow-up Program will be tailored to meet your needs taking into consideration the type of cancer you had, the treatment you received and your general health and lifestyle.

This booklet is your personal record to take with you when you visit any member of your health care team within or outside the hospital. This enables you to have your health information handy when needed.
